

Software For Your Safety Program

SAFETY 101
Proactive Safety Software

www.safety101.com

Manage Your Safety Program with One System

(across all locations)

Mobile Inspection App

Perform walk-around inspections, toolbox talks, JSA's and more

Training Tracker

Keep employee training current with system generated training plan...interface with your ERP, HR and LMS systems

Employee Portal

Supports OSHA guidelines for employee involvement

Document Handler

Store all your documents in one place

Incident Manager

Promotes consistent approach to incident investigations, root cause analysis, etc...

Alerts & Reminders

Prevents "safety things" from falling through the cracks

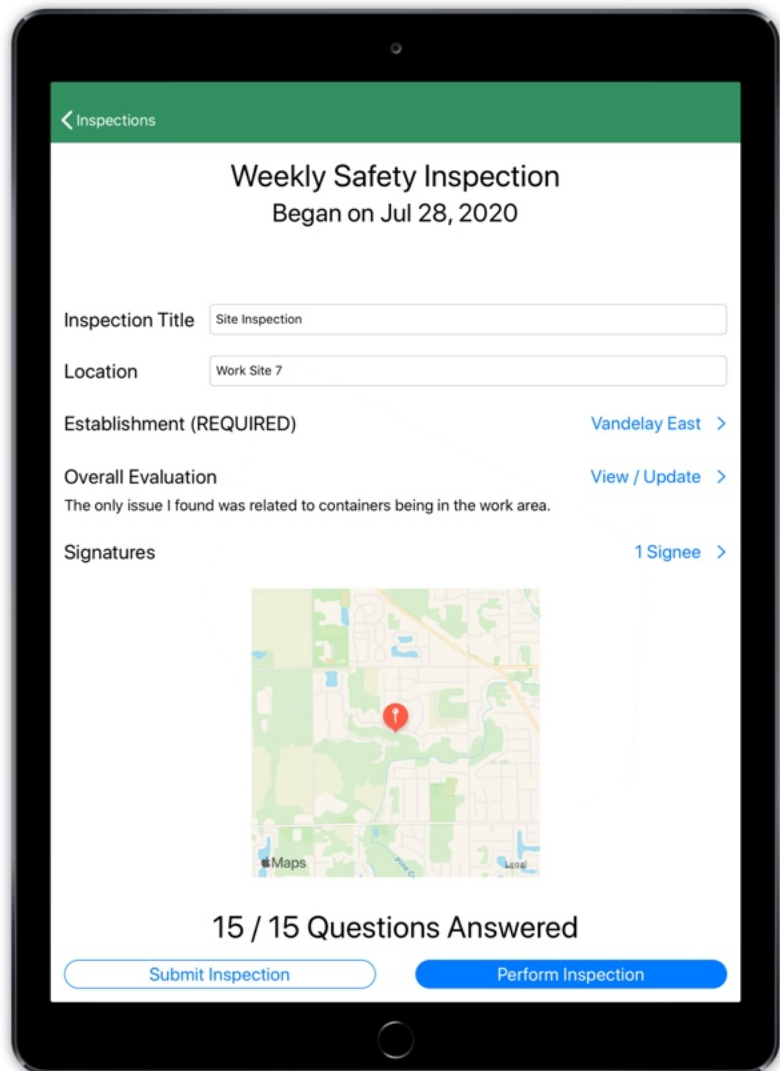

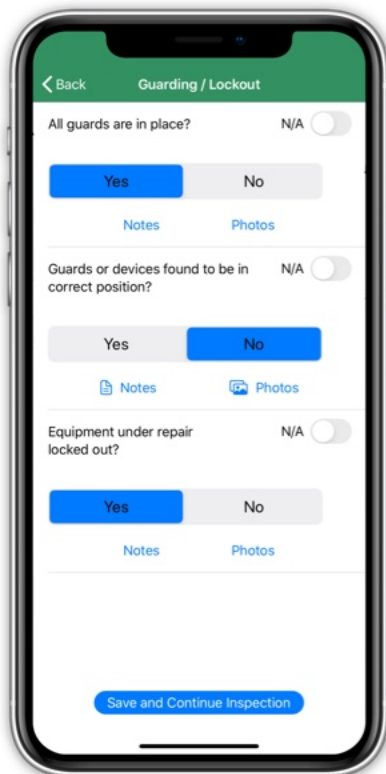

Reports & Analytics

OSHA 300 forms along with safety meeting reports, leading indicators, training forecasts, and more

1. Mobile Inspection App

- Build your own custom checklists:
 - Walk-around inspections
 - Toolbox talks (with attendee signatures)
 - Hazard analysis (JSA / JHA)
 - Confined Space Entry Permits ... and more
- Schedule one-time or recurring inspections
- Document findings with notes and pictures
- Share inspection results and resolve findings
- Operate in off-line mode (no cell service)

2. Training Tracker

- Ensure your teams have the training they need when they need it
- Interfaces with your ERP, HR and LMS systems
- System generated training plan includes courses needed and suggested attendees
- Dashboard lists upcoming courses along with team members with training that has expired or is set to expire
- Schedule courses, sign up attendees, record attendance

- Fire Extinguisher - Expires in 16 days

3. Employee Portal

- Provide your team an easy way to share ideas, report hazards and access documents
- Facilitate a “good-catch” reward and recognition program
- Access upcoming training course schedule
- Support OSHA guidelines for employee involvement
- Available in English, Spanish or French

4. Document Manager

- Store all your documents in one place (emergency action plans, operating manuals, safety data sheets etc...)
- Schedule periodic document reviews
- Track document revision history
- Share selected documents with employees via Portal
- Access documents such as Lockout/Tagout forms and safety data sheets via QR code

HR Handbook Revision 3

08/25/2021

Internal Control Number
156-HRH

1 of 1

www.safety101.com

The screenshot shows the SAFETY 101 web application interface. The top navigation bar includes links for TRAINING, CHECKLIST, PORTAL, SAFETY MANAGER, OSHA 300 FORMS, DOCUMENTS (highlighted), and REPORTS. The left sidebar contains a menu with Documents, Document Types, Document Tags, and Document Review. The main content area is titled 'DOCUMENTS' and features an 'Add Document' button, a search bar, and filter options for Chemical Types, Policy or Procedure, and LOTO. Below the filters is a table listing documents.

DOCUMENT NAME	ESTABLISHMENT	TYPE	ICN	LAST REVISED	
HR Handbook	General East	Policies and Procedures	156-HRH	08/25/2021	View / Update History
Internal Control				08/25/2021	View / Update History
MEK Paint Thinner	General East	SDS		08/25/2021	View / Update History

At the bottom of the interface is a 'Print Report' button.

5. Incident Manager

- Capture observed hazards, near misses and injuries as well as vehicle accidents, property damages and other incident types for all locations in one place
- Promote consistent approach to incident investigations, root cause analysis and corrective action implementation
- Perform periodic audits to ensure once a corrective action is put in place, it stays in place
- Generate OSHA 300 Forms and download 300A CSV for electronic submittal to OSHA

The screenshot displays the SAFETY 101 Proactive Safety Software interface. The top navigation bar is green with the SAFETY 101 logo and the text "Proactive Safety Software". To the right of the logo, it says "General Industries | clayton@erp101.com". Below the logo, there are icons for "To Do", "Resources", "Settings", "Enterprises", "Accounts", and "Log Out". The main navigation bar is white with tabs for "TRAINING", "CHECKLIST", "PORTAL", "SAFETY MANAGER" (which is highlighted in green), "OSHA 300 FORMS", and "REPORTS".

The "SAFETY MANAGER" tab is active, showing a section titled "ADD SAFETY INCIDENT" with the instruction "Select from the four types of incidents". On the left side of the "ADD SAFETY INCIDENT" section, there is a sidebar with the following categories and items:

- INCIDENTS**
 - Add Safety Incident (highlighted)
 - View / Update All Incidents
- AUDITS**
 - Record Audit Findings
 - Approve/Deny Corrective Action Implementations
- OTHER**
 - Work Restrictions
 - Non-work Injuries

The main content area of the "ADD SAFETY INCIDENT" section lists four types of incidents, each with an icon and a description:

- Observed Hazard**: A safety hazard that has been observed but did not result in a near miss or OSHA recordable incident. May be uncovered with a regular safety audit by a safety committee member or by employees that notice the potential risk for injury.
- Near Miss (No Injury)**: An accident that did not result in serious injury, illness, or damage – but had the potential to do so. A person was not hurt and first-aid was not administered.
- Minor Injury**: An accident that did not result in serious injury, illness, or damage. A person was hurt and first-aid may have been administered but the injury or illness was not serious enough to be logged as an OSHA recordable incident. This option is highlighted with a blue background and a "Select" button with a hand cursor icon.
- Serious Injury (OSHA Recordable)**: A serious work-related injury or illness that normally requires medical attention beyond first-aid. May have resulted in employee's loss of consciousness, days away from work, restricted work, or transfer to another job.

At the bottom of the "ADD SAFETY INCIDENT" section, there is a link: [Add Privacy Concern Case >>](#)

6. Alerts & Reminders

Pricing FAQ

Q. What is a system user?

A. Someone with a unique email address who has been granted authorization by a System Administrator to log in and use Safety 101.

Q. Is there an annual maintenance fee?

A. No.

Q. How do I get started?

A. Visit safety101.com/pricing and click "Buy Now"

Q. How much will it cost if my account uses more than 10 gigabytes of data?

A. You will be charged an additional \$5 per month for each additional 10 GB's of data used. 10 GB of data is roughly:

- 31,460 PDF documents
- 6,140 photos
- 13 hours of video

Q. I want the Portal to be accessible from every plant floor computer and a tablet in the break room, how many devices can access my organization's Portal?

A. An unlimited number of devices (computer, tablet or phone).

Leadership Team

Clayton Carroll - Sales and Marketing

Before joining the Safety 101 team, Clayton was the National Sales Manager for Falcon RME, a Michigan based manufacturer of road maintenance equipment. During Clayton's six years at Falcon, sales grew an average of 32% per year.

Most recently, Clayton has focused on providing social media marketing services for both retail and industrial customers. Clayton holds a BA in Philosophy and Religion from Covenant College.

David Groulx - Software Development

Prior to Safety 101, David served as a computational mathematician for a variety of watershed projects sponsored by the University of California at Santa Barbara.

Over the past decade he has developed a number of business software systems including a web-based ERP system. David holds a BS from the University of Utah in Computational Mathematics.

DeLynn Taglauer - Sales and Marketing

DeLynn brings 10 years of safety leadership experience to Safety 101.

This experience gives her invaluable insight into the challenges facing busy, multi-tasking safety leaders. DeLynn has a BS in Psychology from Central Michigan University.

Mark Groulx - Business Development

Mark has served as CEO, COO, CFO, CIO and entrepreneur.

He is a six-time member of the Inc. Fast 5000 list of the fastest growing companies in the U.S. and a two-time Ernst & Young Entrepreneur of the Year Finalist. Mark has a BS in Computer Science from Michigan State University and an MBA.
